

#### 4. Popular (Lay)

- Clearly Seen: Constructing Solid Arguments for Design**, Dr. Randy Guliuzza (2012, 64 pages, color ill.). It provides a step-by-step teaching guide for using the living things that the Lord Jesus has made as a witness to His reality. It includes a Q&A section. \$10.00
- Creation Scientists Answer Their Critics**, Duane Gish (1993, 451 pages). A response to the many books by evolutionists attacking creationism and creation scientists. It contains strong evidence supporting creation, with bibliography and index. \$17.00
- Dismantling the Big Bang - God's Universe Rediscovered**, Alex Williams/Dr. John Hartnett (2005, 220 pages, ill.). "In this easy-to-read format, [the authors] explode this naturalistic explanation for the universe, and show that the Biblical model provides a far better explanation of our origins." (Back cover) \$15.00
- The Lie: Evolution**, Ken Ham (Rev. 2012, paper, 240 pages, ill.). A key book which clearly outlines the foundational importance of Genesis to the Christian faith and the effectiveness of Creation evangelism. **25th anniversary edition.** \$13.00
- World Winding Down**, Dr. Carl Wieland (2012, 96 pages, color ill.). "A layman's guide to the Second Law of Thermodynamics." (cover) \$12.00
